

Melilas Middle Years: Academic Results 2021

The results published below present academic attainment in our core subjects of English, Maths and Science. The taught programme of study follows the KS3 English National Curriculum and the standards referenced below are against age-expectations for the UK and British International benchmarks.

Panaga School Melilas attainment is excellent and reflects the fact that most of our student's attainment is at least at age-expectations, and a significant proportion of our students are operating at above age-expectations in comparison to UK and British International standards.

These results are based on rigorous GL progress test assessments, one of the largest providers of assessment systems in British education.
